

14 Series 1480

sku: 26219

DESCRIPTION

The Annovi Reverberi 14 Series 1480 high pressure washer belongs to the 14 Series, a range of professional **extra-flexible high pressure washers** with no need for an electrical power supply. Petrol-driven, it is the ideal solution for cleaning in the construction, farming and industrial sectors and for car-washes and workshops, where high performance is required in continual, heavy-duty use.

Built entirely from quality, **corrosion-resistant materials such as brass**, it guarantees a long working life and extremely easy maintenance thanks to the accessible position of the power unit.

AR 1480 is fitted with a piston pump with **brass head** with an extremely high-performing connecting rod system, complete with **automatic by-pass valve** for pump head pressure shut-off and **thermal valve**, which discharges the water if its temperature rises to levels which would damage the high pressure washer.

The machine incorporates a high-performing HONDA GX390 engine with automatic engine speed reducer, providing a maximum pressure of 280 bar, a maximum flow rate of 960 l/h (adjustable using the pressure regulator provided) and speed of 3400 rpm. The **oil level** can be **checked** at any time, and changes are very simple thanks to the caps and discharge slots. The **water inlet with inspectable filter** is on the front of the machine, conveniently located for connecting a garden hose to the unit.

The 14 Series 1480 has been designed to combine **outstanding reliability** with **exceptional agility**. With its rugged painted steel trolley, with handle with non-slip grip, and the inflatable tyres, this unit can easily be moved across even the most difficult terrains, while the rubber front feet ensure **stability** during use. The detergent tank with integral suction system is in the front of the trolley for easier access and use.

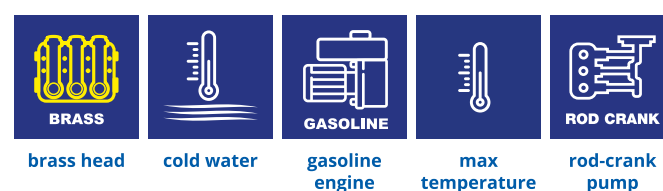

The set of professional accessories supplied guarantees outstanding power and perfect cleaning capabilities. Supplied complete with:

- **high pressure trigger gun** with brass thread connection;
- corrosion-resistant **steel lance extension**;
- **4** interchangeable **nozzles** for mounting on the lance to vary the water jet

APPLICATIONS

TECHNICAL PROPERTIES

self priming function

PERFORMANCE

- depending on requirements;
- particularly tough, hard-wearing 10 metre **reinforced high pressure hose**

Once the job is done, all accessories can conveniently be stowed in the accessories holder on the trolley handle.

TECHNICAL PROPERTIES

AR Code	26219
Model	1480
EAN Code	8016287262194
Max pressure (bar)	280
Max flow rate (l/h)	960
Revolutions / min (rpm)	3400

RRV D 1

- Triplex pump with ceramic pistons and connecting rod system with brass pump head
- Tempered stainless steel pistons
- Automatic by-pass valve with pump head pressure discharge
- Direct coupling pump with gasoline motor
